Turbine Tidbit:

1791: A patent was given to John Barber, an Englishman, for the first true gas turbine. His invention had most of the elements present in the modern day gas turbines. The turbine was designed to power a horseless carriage.

## Nichole Cotter, President

Spring has sprung officially here in Minnesota, one can only hope! It took its

sweet time, but I think that the weather is finally going to cooperate. In the world of Turbines, spring sprung early and we currently have several projects in full swing. Our refinery maintenance contract is having its largest spring turnaround in our history. We have over 100 millwrights on projects!

We had the pleasure of running into quite a few of you at the various spring tradeshows that S.T. Cotter

participated in; Electric Power in New Orleans, CTOTF in West Palm Beach Florida, and the upcoming 7F Users Group in Phoenix. We enjoy traveling to the different shows, meeting new faces and visiting with our current customers. We will also be traveling to AREGC at the end of June.

Please join us at our upcoming Steam Turbine and Generator Users Group conference. See information on the left.

## Sales...

In February, Keith Patterson joined S.T. Cotter as our Refinery\Chemical Business Development Manager. Keith will be focusing on shut downs, capital projects, long term contracts, and emergency services for these markets. His efforts are helping to support and grow existing customers along with cultivating new ones. Keith is also been given the task, for this new arena that S.T. Cotter has been involved with for several years, remains successful. Keith will be based out of our new Missouri office just outside of Kansas City. Keith understands that customer service is a key to growing this business, such as being involved with projects from start to finish.

Keith brings over 16 years of experience in serving the Power Generation and Chemical Industry in both the domestic and international markets. Prior to joining ST Cotter, Keith held various power industry positions at ProEnergy Services, Alstom Power, Alcolac, and Rhodia; these include Plant Operator, Account Manager, Regional Sales Manager, Sales Manager – Field Services, and Service Sales Manager. Keith has been involved with plant installation, start-up and commissioning, operations and maintenance, shut downs, outage support, and component repairs with various OEM equipment suppliers.

Keith has been married for 17 years to Martha, and they have 2 children, Emilee and Preston. Keith enjoys all outdoor activities with his family, hunting, fishing, and camping. He is also a soccer coach for both of his children. His major in college was computer science and industrial safety at UCM Warrensburg while serving in the Army Reserves for 5 years.
